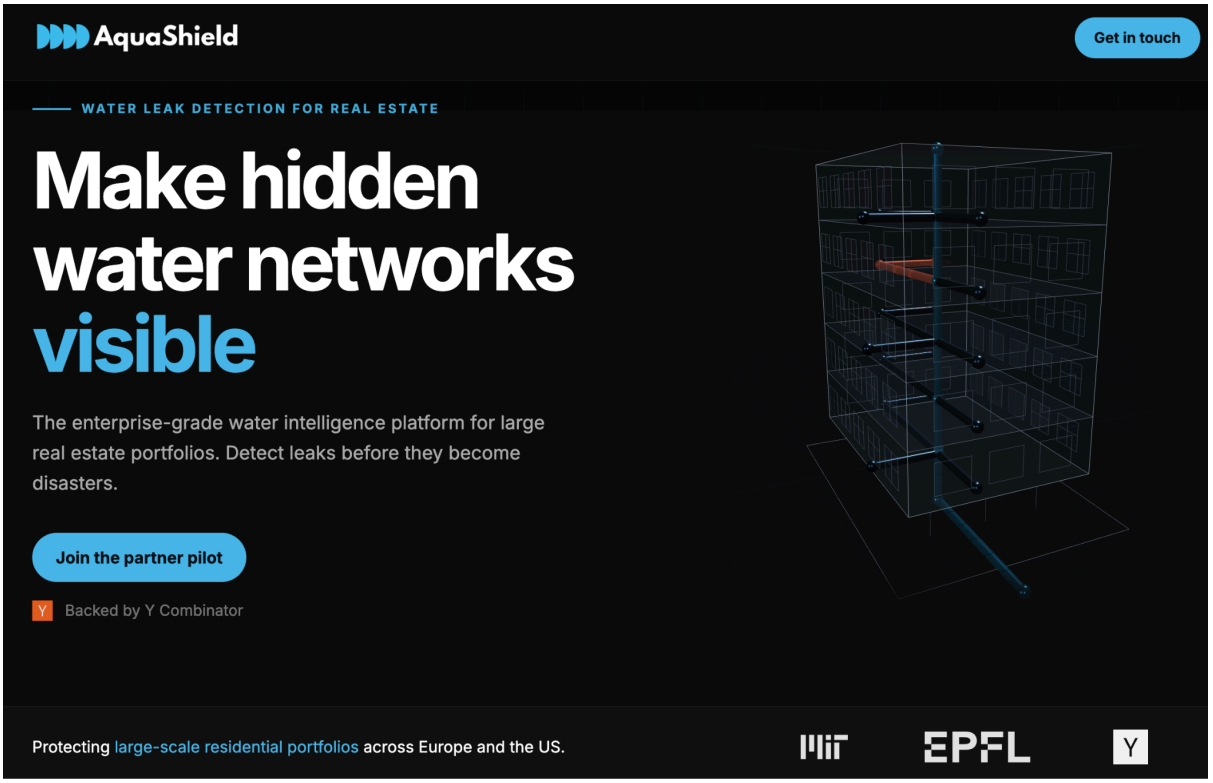
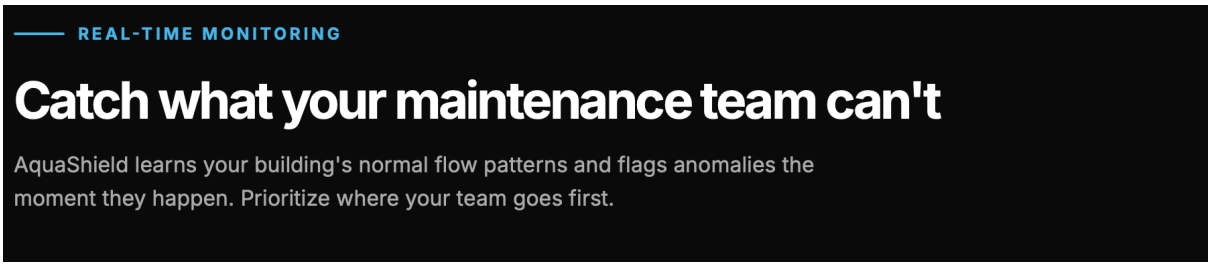
First of all great website! Fire visuals! :)



1. Remove - enterprise-grade (sounds to chatgpt) “The water intelligence platform for large real estate portfolios.”
2. “Start a pilot rollout” instead of “join the partner pilot”
3. Protecting large-scale residential portfolios across Europe and the US. remove “large-scale” and change Europe and US.
4. Or add a tagline near the top: "The smoke detector for your building's water system"



1. "Catch what your maintenance team can't" → rephrase to "Catch leaks before your tenants notice" or "before they turn catastrophic."
2. Pipe graphic (second image) —> colors too dark, barely visible on the dark background. Needs more contrast
3. Second and third image has zoom/pull interaction —> hinders scrolling —> remove that, keep it static like the first image

Last section:

PILOT PROGRAM

Start monitoring in weeks

- No construction. Sensors clamp onto existing pipes.
- We handle network mapping and sensor placement.
- Built for portfolios with 1,000+ units.

Full name

Work email

Company

Portfolio size

Select portfolio size

Message (optional)

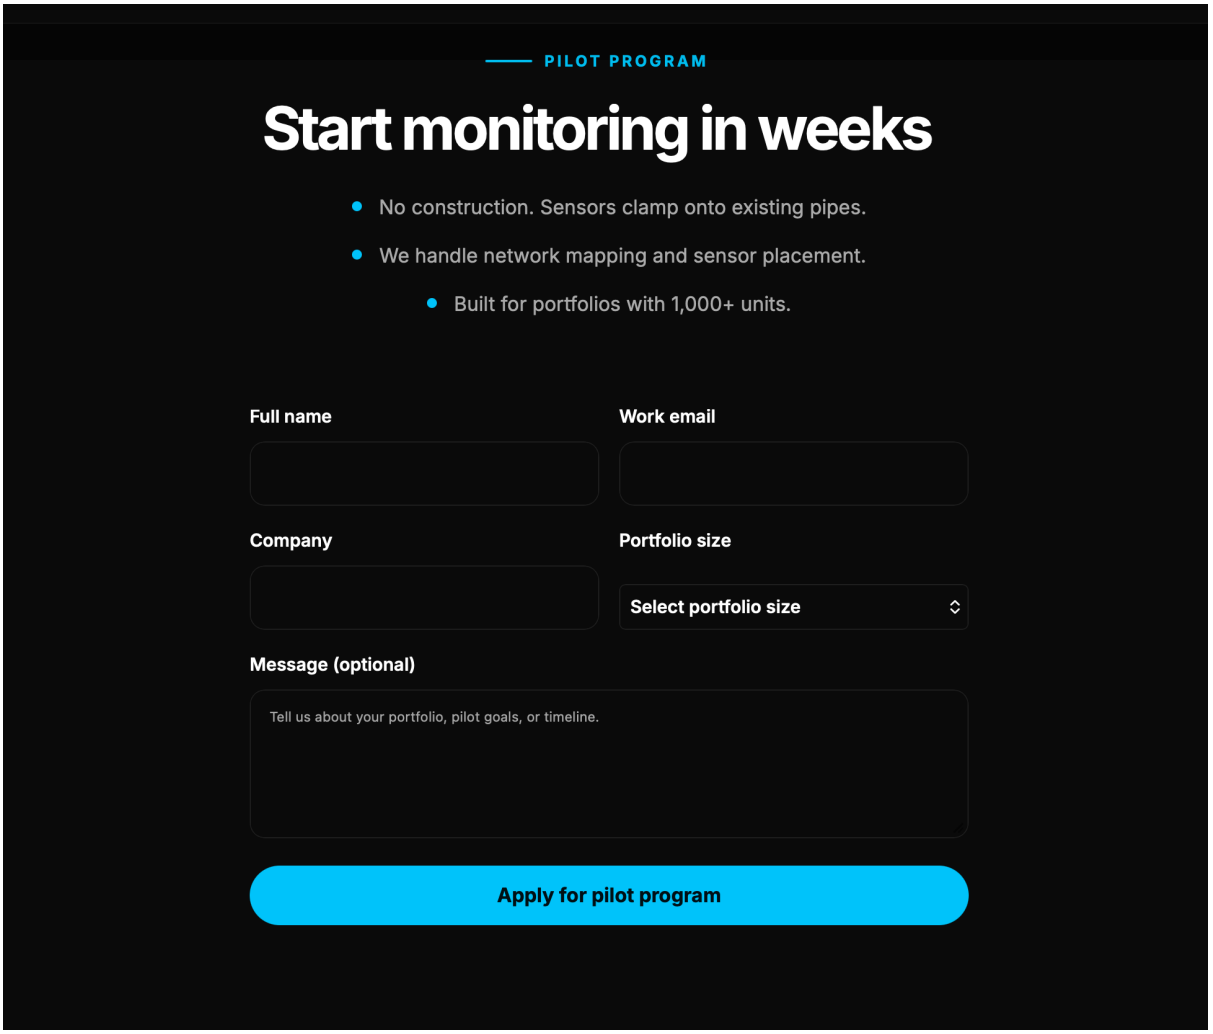
Tell us about your portfolio, pilot goals, or timeline.

Apply for pilot program

- “No pipe cutting” instead of “No construction”. Sensors clamp onto existing pipes.
- Remove third bullet. We would do pilots with smaller porfolios at this stage. we can add that later.
- In the message: tell us about your portfolio, pilot goals and timeline.
- "Start monitoring in weeks" is vague. Make it concrete: "From signup to live alerts in under x weeks" or Maybe change “Start monitoring in weeks” —> "Never miss a leak again" or “Start protecting your portfolio today"
- I would change "Apply for pilot program" to “Get started" or "Request a pilot" or

- And i would add links via icons for our future LinkedIN/instagram as well as contact info at the bottom in the middle → Email linkedin placeholder etc

On desktop this section looks a bit weird:



- The dropdown for portfolio size is not the same height
- the Fontsize in the textbox is too small
- would choose a uniform fontsize
